

PROVIDER TRAINING 2023 REVISED E&M GUIDELINES

Contact Us: 877-418-5564 | namas@namas.co

Type of Training

Training can be provided virtual or onsite to meet your needs

Recording Options

Recording options for OnDemand replay are available

Session Pricing

Pricing per session, not per attendee

Training CEUs

CEUs options through the AAPC are available

Inpatient Services

The Inpatient will hold challenges with the new guidelines. NAMAS training ensures these challenges are addressed.

A few examples include:

- How to count standing orders
- Review of testing auto imported by same specialty or different specialty
- The new additions to problem addressed for Low Complexity added by the AMA for Inpatient
- Addressing risk of complications as opposed to direct management

Your sample notes are used to provide hands-on learning.

Emergency Services

The ED is unique. NAMAS training ensures these anomalies are addressed.

A few examples include:

- Risk of management for patients leaving AMA,
- Nuances with independent interpretation of tests
- Prescription drug management
- Acute vs chronic presenting problems

Your sample notes are used to provide hands-on learning.

Nursing Facility

Care for the elderly is typically focused on chronic needs, while acute needs do arise.

NAMAS training will cover NF, ALF, and home and address the focus of documentation from the management process (only) of the chronic problems to also include the risk of the management. This includes alternative treatments considered and underlying complications.

Your sample notes are used to provide hands-on learning.

Office | Clinic Setting

Office providers have been utilizing 2021 DG for 2 years, but documentation modifications are still needed and a few examples include:

- Identification of all risk and considerations of complications as opposed to direct management
- Proper documentation of RX management
- How to communicate risk associated with consult/referral treatment plans.

Your sample notes are used to provide hands-on learning.
